

Product Information

LED Superstar MR16 35

Product Overview

Product	Wattage	CCT	lm	Beam Angle	Base
LED Superstar MR163524 4.6W/827 12V GU5.3	4.6	2700K	350 ¹	24°	GU5.3
LED Superstar MR163524 4.6W/830 12V GU5.3	4.6	3000K	350	24°	GU5.3
LED Superstar MR163536 4.6W/827 12V GU5.3	4.6	2700K	350	36°	GU5.3
LED Superstar MR163536 4.6W/830 12V GU5.3	4.6	3000K	350	36°	GU5.3
LED Superstar MR163536 4.6W/865 12V GU5.3	4.6	6500K	350	36°	GU5.3

Benefits

- Free of multiple shadows for an excellent accent lighting
- Dimming towards your ideal ambience
- Up to 85% Energy Saving, spend little and save a lot
- Consistent lighting color avoids the color difference
- Install and forget: assured by Germany quality standard

Key Features

- Uniform and clean beam thanks to the innovative Fresnel optics
- Excellent transformer and dimmer compatibility
- High-quality replacement of 35W/50W halogen lamp
- Color consistency: <5 Standard Deviation Color Matching
- 25,000 hours lifetime²
- 12VAC input voltage
- UV and NIR radiation free
- Mercury free

¹ Typical values. All the technical parameters apply to the entire lamp. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

² The average lifetime of LED lamps is defined as the number of hours when the light output of 50% of a large group of identical lamps goes below 70% of its initial luminous flux (L70B50, IEC60969). The lifetime is estimated at room temperature (25° C), free air burning, base up burning position and at rated voltage.

For lamps with a weight significantly higher than that of the lamps for which they are a replacement, attention should be drawn to the fact that the increased weight may reduce the mechanical stability of certain luminaires and lampholders and may impair contact making and lamp retention.

Common Characteristics³

Type	Average lifetime ³	Switching cycles (30s on, 30s off)	Casing material	Starting time	Warm up time for 60% light	Power factor
Superstar MR16 35	25,000hrs	100,000	Plastics	0.1s	<0.5s	0.9
Type	Nominal current	Tc temperature max.5	CRI	Mercury max.		
Superstar MR16 35	410mA	77° C	80	0.0 mg		

Disposal information

- Lamps with WEEE sign can be returned at specific collection points.
- LED lamps have to be disposed as special waste.

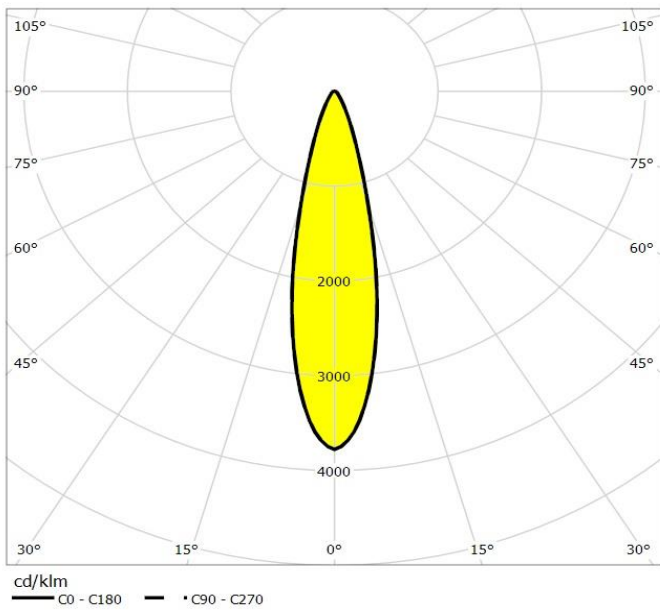

³ The Tc is defined as the highest permissible temperature which may occur on the outer surface of the LED lamp (in the indicated position) under normal operating conditions and at the rated voltage/current/power or the maximum of the rated voltage/current/power range (DIN EN 62031: 2009-01)

Symbol Description: ET / Electronic Transformer MT / Magnetic Transformer

⁴ Typical valuesThe test results reflect the measurement of the individual devices that were used in tests. OSRAM does not take over any responsibility, warranty or liability that this results can also be achieved by using the devices under other conditions or when using successor models of the tested devices or different models of the same manufacturer.

The test results were achieved by using the above mentioned LED-lamp types. OSRAM does not take over any responsibility, warranty or liability that this results can also be achieved by using the devices under other conditions or when using other LED-lamp types.

LED lamps contain several electronic components. Under unfavorable conditions these can lead to acoustic noise. In case of resonance even low noise can cause audible effect. Possible factors influencing this are the installation, the design of the lamp holder and the luminaries (acoustic resonance effect) as well as the dimmer or the transformer (harmonics or electronic resonance).

8	Clipsal	31E2PUDM	10-350W	T	9.38% - 100%	
9	HPM	CAT400L	400W	L	0.69% - 100%	
10	Panasonic	WMS549	40-400W	L	0.83% - 100%	

⁵ Typical valuesThe test results reflect the measurement of the individual devices that were used in tests. OSRAM does not take over any responsibility, warranty or liability that this results can also be achieved by using the devices under other conditions or when using successor models of the tested devices or different models of the same manufacturer.

The test results were achieved by using the above mentioned LED-lamp types. OSRAM does not take over any responsibility, warranty or liability that this results can also be achieved by using the devices under other conditions or when using other LED-lamp types.

LED lamps contain several electronic components. Under unfavorable conditions these can lead to acoustic noise. In case of resonance even low noise can cause audible effect. Possible factors influencing this are the installation, the design of the lamp holder and the luminaries (acoustic resonance effect) as well as the dimmer or the transformer (harmonics or electronic resonance).

Product Information

LED Superstar MR16 35

Connect with Redback40+APAC /220-240

Compatibility performance with dimmer ⁵ (connect with up to 3 lamps)

Legend

L/Leading edge dimmer

T/trailing edge dimmer

U/Universal Dimmer

Limited Dimming Range (dim down to >20%)

Wide Dimming Range (dim down to < 20%)

	Brand	Model	Load Range [W]	Type	Dimming range (%)	Flickering at low dim values
