Flood Light

The HKD-FL100 LED Floodlight represents the next generation of high-performance stadium and area lighting. Engineered with an optimized structure, advanced optics, and superior electrical design, it ensures exceptional brightness and visual clarity that meets modern TV broadcasting standards. Its forged pure aluminum heat sink delivers outstanding thermal management, enhancing longevity and efficiency. The compact, lightweight design allows for easier installation, while optional remote drivers and multiple light distribution choices provide versatility for diverse applications. Ideal for both new and renovated stadiums, the HKD-FL100 delivers powerful illumination with reduced operational and maintenance costs.
